

SKI: Mayflower Goes Forward

30 Aug 1984 *Horace*

(Continued From Page 1)

completed, Wasatch County has placed stringent regulations on the development, requiring development of a "staging plan."

A specified amount of the development must be built and sold at each stage before building permits are approved for the next stage, Mathis said. Wasatch County required extensive market studies before granting approval of the general plan.

Extensive geologic studies must also be completed prior to the development of each of the seven planned "neighborhoods," he reported. Construction of the proposed Jordanelle Dam as part of the Central Utah Project will also affect Mayflower. If Jordanelle is built, the development will be changed to include five neighborhoods; if it is not, there will be seven neighborhoods.

If seven neighborhoods are built, there will be about 2,500 housing units in the development. If only five neighborhoods are constructed, the number of housing units will drop to around 2,000.

Mathis indicated that the way was cleared for approval after a private agreement was worked out between developers and the mining interests in the area.

"Wasatch County was not a party to that agreement, since it specified under what conditions the mining operations could continue to function," he said.

A major environmental concern involved mine tailings ponds at two old mining sites, the Olson-

Neihart pond and other ponds near a mine where ore was refined.

"They must develop a plan to satisfy the State Health Department and the Environmental Protection Agency on the handling of these hazardous wastes," Mathis said. "Also, because of hazardous wastes, they agreed not to develop one canyon.

"Sewage must also be taken care of before the density re-

quirements of the development are determined," he reported, since water quality as the water leaves the resort area is a major environmental concern.

He emphasized that Phase One will involve the most expensive part of Mayflower, the Village Center where hotels, shops and common areas are located. Utilities, water supplies, roads and sewage must all be taken care of with that phase.

CAMP: Labor Day Holiday To Draw Outdoor Masses

(Continued from Page 1)
est assumed control in June.

The Forest Service makes no special preparations for Labor Day, Coleman said, partly because of the, "Pack-it-in, Pack-it-out" program.

"We don't pick up any garbage. We ask those at the campground to take it home with them," Coleman said.

Popular campgrounds include those up American Fork Canyon, where there is room for about 180 families; Strawberry, where about 550 groups can camp; Payson Lakes Campground, ready for about 100 groups; and Blackhawk Campgrounds, ready for another 100 groups.

All campgrounds except Whiting and Santaquin Canyon are open.

Visitors searching for variety

can go to Strawberry for fishing and either Blackhawk or Current Creek for horseback riding.

Blackhawk and Current Creek are both designed for horseback riding. Blackhawk includes an estimate 200 miles of horse trails, Coleman said.

The Uinta National Forest stretches from Kamas to Nephi and includes roughly one million acres.

Uinta National Forest hosted an estimate three million visitor days (one person staying 12 hours is considered a visitor day) in 1983, Coleman said. Of the three million, 1.5 million were visitors at campground sites and the other 1.5 million was the estimate amount of visiting hours by those in the forest, but not at established campgrounds.

Documentation on how the units will be built and how such things as landscaping, roads, parking spaces, height limitations, sanitation, utility lines, stabilization of slopes, maintenance of paths and trails, maintenance of sidewalks, fire and police protection, etc., are handled fills volumes. The Wasatch County Planning Commission's order approving the concept alone covers 60 pages, single-spaced.

A school site is required, plus a road plan that does not interfere with existing rights-of-way, and the roads must be designed in such a way that noise pollution is reduced.

Mathis said one sticky problem resulted from the need for health officials to inspect hot tubs used in the time-share units. An agreement was finally reached whereby the county will pass an ordinance relating to the regulation of hot tubs and similar spa facilities applicable to all such facilities and requiring written notices to the county from people responsible for correcting any public health or safety hazards involved. A mechanism will be provided to immediately cure any public health or safety risks at the expense of the individuals liable for the hot tubs.

"There's a lot going on in that area. Jordanelle, Deer Valley, Mayflower, Heber Valley and the mining interests are all interested in the same property. It has taken a long time to satisfy all the concerns," Mathis said.

lease to theaters is around March or April. It is a movie not only shot in Utah but based on a fictional laboratory in Utah called BioTek Agronomics.

"It's quite realistic," Jones said. "I think people will have the feeling this could happen if

guard; Yaphet Kotto (*Brubaker, Alien, Fighting Back, The Star Chamber*), who plays a government man; and Jeffrey DeMunn (*Ragtime, Frances, I'm Dancing As Fast As I Can, Windy City*), who plays a scientist at the lab.

Last Saturday, casting direc-

that we have more than competent actors available here," Praggastis said.

She also just finished a 10-week educational project for WICAT Computer Systems Inc. using a local cast of 16 actors, including six children. It will be marketed worldwide.

Briefs

PMS Meet Sept. 6

The Utah PMS Center at Orem Community Hospital will be presenting a free lecture on pre-menstrual syndrome Sept. 6 at 7 p.m. The lecture will be presented by Patty Cannon, director of the Salt Lake and Orem clinics, in the Orem Community Hospital west lobby.

For further information call the Utah PMS Center at Orem Community Hospital at 224-1810.

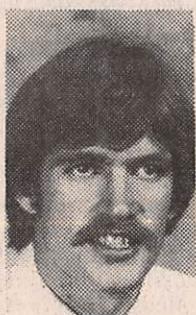

School Garage Sale

The Lindon Elementary School PTA is having a garage sale Sept. 14 and 15, from 9 a.m. until 5 p.m. The proceeds of this event will go toward a school computer that the children will use. They are also hoping to buy library books for the school. Those who would like to donate items or have questions, should contact Gayleen Carlton, 785-5212.

He is survived by his wife of Payson; one son, Richard Michael; two daughters, Lisa Marie and Alana Faye; Payson; three brothers: Gordon F. Hiatt, Salt Lake City; Duane E. Hiatt, Provo; and Roger L. Hiatt, Payson; and two sisters: Mrs. Elton (Diane) Jensen, Emporia, Kan.; and Mrs. Richard A. (Lu Jean) Pierson, Little Rock, Ark.

Services will be 11 a.m. Saturday in the Payson First and Fifth LDS Wards Chapel, 225 S. 400 East. Friends may call at the ward Relief Society Room 7-8 p.m. Friday or one hour prior to services Saturday.

J. Richard Hiatt

Hughes, 26 years.

For more information contact Janina Chilton at 373-4400 Ext. 240.

Licenses to Close

All Utah drivers license offices will be closed Sept. 7 for an employee workshop.

Drivers License Division employees statewide will be attending their annual workshop at the University of Utah. Employees receive training, discuss changes and divide into groups to develop input on division programs.

All offices will resume normal operating hours on the following Monday.

School Seeks Funds

The Provo City School District Foundation, established one year ago to solicit private money for the school district, has announced its fall fund raising events.

In addition to "The First Summer Games" Monday, the founda-

Melford King Party Set Sunday

Long-time Payson resident, Melford King will celebrate his 80th birthday Aug. 30. He was born in Antimony (formerly Coyote), Garfield County, the oldest son of Alonzo and Martha Ann "Mattie" Wallace King. On April 12, 1928, he married Della Lyman in Manti LDS Temple.

King farmed and herded sheep in Torrey, Wayne County, before moving to Payson in 1936, where he bought a farm west of town and owned a dairy herd. He also worked at the Pacific Cast Iron Pipe Co. and retired in 1969 after 19 years.

Mr. and Mrs. King have had nine children, seven of whom are living: Melford Arl, Hal H. and Garth of Payson; Mrs. Don B. (Afton) Hales, Salt Lake City; Terrill, American Fork; Mrs. Ernest (Ruth Ann) Wilkins of Garden Grove, California; and Mrs. Brent (Jane) Ludlow of West Valley City. They have 27 grandchil-
